

Installation notes

Photoshop

Load or replace a library of swatches

In Window, choose Swatches and one of the following from the Swatches panel menu:

- **Load Swatches:** Adds a library to the current set of swatches. Select the library file you want to use, and click Load.
- **Replace Swatches:** Replaces the current list with a different library. Select the library file you want to use, and click Load. Photoshop gives you the option of saving the current set of swatches before replacing them.

Add the SICO library to the Photoshop presets

In your computer, place the SICO library file in the Color Swatches subfolder, located in the Presets folder. Once this is complete, restart the application. The name of the SICO library will appear in the Swatches panel menu in the default presets location.

Name of a colour library

Loads, in alphabetical order, a specific colour system listed in the Swatches panel menu. You can either replace or append the current set of colours with the library you're loading.

Return to the default library of swatches

Choose Reset Swatches from the Swatches panel menu. You can either replace or append the current set of colours with the default swatch library.
